MODOLO

1952 - 2017

65 years anniversary

Welcome to our new product range for the years 2017-2018.

In this year we celebrate our 65° anniversary and we are happy to show you our news !

We made a new version of our beloved Trekking handlebar Dumbo 3D and a bike bag specially suited for it. We hope you will enjoy your ride with our smart and safe products, made of high quality material and deep ergonomic study.

The making of an Italian Legend :

Started in 1952 in a small factory in the north-eastern Italian town of Santa Lucia di Piave by Mr. Adamo Modolo, the company initially made a variety of steel parts for bicycles. Domenico Modolo (son of the founder), joined the company in 1976 having graduated as an industrial engineer. Soon afterwards, the famous TOP brake-set made in light alloy, started production. These brake-sets were exported all over the world and set the standard for high quality Italian aftermarket components.

MODOLO DUMBO 3D - V2

THE ADJUSTABLE TREKKING HANDLEBAR

The renowned Modolo DUMBO handlebar, appreciated by who are into bike touring from around the world for its freedom of adjustment, is updated this year with two new versions. Both shares the classic DUMBO “U” shaped central system, but they offer two different types of bends.

The multi-positions trekking handlebar Modolo Dumbo 3D-V2, thanks to its original shape, allows the fine-tuning in 3 axes of the geometry. You will be able to adapt every angle, length and height to your personal need. The 2 appendix are locked to the central “U” tube with special clamps, strong and easy to adjust. Persons with skeletal asymmetry will find their best comfort using the DUMBO handlebar. The expert cyclist will find a solid ally in the long run.

The **Standard version** is an improvement of the previous geometry, now less squared, more compact, and comfortable for the hands. The total length of the handlebar with these new appendices reaches now 62cm.

The **Sport version** provides an horizontal position and is suitable for those who want a lighter product, or does not need the multi-position.

These two new appendices are also available as an upgrade for owners of the previous version.

- Each of the 2 new version of the dumbo handlebar shares the same central “U” tube, clamps, and bridge.
- The user can upgrade and convert the shape buying the Standard or Sport appendix.
- The 2 new appendix are compatible with older version of the Modolo Dumbo
- For a more compact and lighter shape the central “U” tube can be cut (instructions provided on manual)
- The tubes are laser marked with measured references for precise setting of the desired angle, length or height.
- The Special Clamps with embroiled logo allows the users to set all the regulations on the Modolo Dumbo handlebar
- The bridge solidly keep together the sides for a rigid and safe ride. Precise and fast alignment of the two sides. Laser logo and cable passage.

Standard version :

Length: from 56 to 62 cm | **Weight:** 629 gr.

Sport version :

Length: from 64 to 72 cm | **Weight:** 577 gr.

Common detail :

Material: ALU 5086 H34 | **Height:** variable 35 mm.

Lateral Angle: +/-10° or free | **Lateral Rotation:** +/-35° or free

D. Central Tube: 25.4 mm | **D. Lateral bends:** 22.2 mm

Color: Black anodized, laser detail

MODOLO YUMA

BUTTERFLY TREKKING HANDLEBAR

Modolo Yuma multi-positions handlebar, made of quality material. A very versatile and comfortable handlebar, developed for trekking and touring bikes. Born in the late 1992 at Modolo, the Yuma Handlebar is perfect for bike tours.

Thanks to its particular design Modolo Yuma handlebar offers great hand protection, shocking absorption and 3 hand positions. With this handlebar you will improve your bike ride, avoiding hand pain in the long ride.

Material: ALU 5082 H32 | **Size:** 56 cm (center/center)
Color: Black or silver anodized | **Weight:** 390 gr.

MODOLO MOHICAN

ATB-TREKKING HANDEBAR

Modolo Mohican multi-positions handlebar, built with quality material, add several hand position and protection to your hand. The Modolo Mohican will improve your bike comfort .

Thanks to Modolo Mohican handlebar you will have 3 different positions, the particular geometry helps in protecting your hand and absorb vibrations from the road.

Material: ALU 5082 H32 | **Size:** 56 cm (center/center)
Color: Black or silver anodized | **Weight:** 320 gr.

MODOLO GRANFONDO

RISED ROAD HANDLEBAR

Modolo Granfondo is a unique handlebar in the market, designed to give a comfortable ride thanks to a rise road geometry. It is a good alternative for road, trekking or commuting bike. The particular shape allow a rise positions and a wide lower bend, the perfect shape for people who live in bikes, but find the classic road handlebar too race oriented for daily use.

The Modolo Granfondo handlebar is the only rise road bike handlebar in the market. Great comfort and a longer length in the vertical bend for a great hand comfort!

Material: ALU 6061 T6 DB | **Size:** 43 cm | **Diameter:** 26mm | **Rise:** 30mm
Drop: 139mm | **Reach:** 81mm | **Color:** Black anodized | **Weight:** 350 gr.

MODOLO X-BOOST

ROAD HANDLEBAR

Modolo X-boost shares the original “Curvissima” shape used in the KX handlebar. Made of lightweight aluminium 6061, is a classic Modolo handlebar now reissued also in silver finish, to best match vintage bicycles. The height of the bend (drop) is greater at 145mm. The depth (reach) is also bigger, at 102mm. The X-BOOST, has the upper angle of 16°, so that the hand position on the levers is straight, offering great comfort.

The lower bend, “CURVISSIMA”, is the direct evolution of the anatomical bend patented by Modolo in 1985 that allowed only two hand positions. This bend has a super-comfortable micro-positions grip.

Material: 6061T6 2 Butted | **Surface:** Ceramic Shot-Peening
Size (center-center): 40-42-44 cm | **Diameter:** 26/31,8 mm
Finish: Black or silver anodized | **Weight:** 270 gr. (42 cm)

MODOLO VENUS

ROAD BAR FOR SMALL HANDS

Modolo Venus handlebar uses a special geometry, born in 1999 at Modolo, studied for people with small hands; with this shape the brake levers are brought almost 9mm nearer. In 2005 the design has been modified in the lower part of the grip, so now it has the same “CURVISSIMA” shape as other Modolo handlebars, giving an increase in comfort by allowing an infinite number of micro-positions.

The special shape of Modolo Venus shortens the distance from the brake levers, this improve control and braking force in persons with small hands. The micro-positions of the “curvissima-shape” give a comfortable area for your hands.

Material: 6061 T6 butted | **Surface:** Ceramic shoot peening
Size (center/center) : 36–38–40–42 cm | **Diameter:** 31.8 / 26 mm
Finish: Black or silver anodized | **Weight:** 269 gr. (40cmx31.8)

MODOLO PISTA

CLASSIC PISTA HANDLEBAR

Modolo Pista Handlebar, the classic bend for vintage and fixed bikes, in aluminium 6061 T6 .

The Modolo Pista Handlebar with classical pista bend, high anodized finishing and old style Modolo logo laser marked.

A classic handlebar that will improve your bike's beauty. Match it with the Modolo Q-Race 11 stem for a unique piece of unbelievable elegance!

Material: AL 6061 T6 | **Size:** 40 - 42 cm | **Diameter:** 26mm
Color: Silver anodized | **Weight:** 270 gr

MODOLO Q-RACE 11

CNC MACHINED QUILL STEM

Modolo Q-Race 11 quill stem, perfect for vintage bike, made in aluminium 6061 CNC machined.

A true classic that match elegance precision and safety. The new Modolo Q-Race 11 stem unite modernity with the past in this beautiful product.

Material: ALU 6061-T6 | **Size:** 90 - 100 mm

Clamp diameter: 26mm | **Tube diameter:** 22.2mm | **Weight:** 280 gr.

MODOLO KION

SUPER LIGHT BIKE STEM

Modolo Kion stem, super light and elegant made of aluminium 2014 T6. With a weight of only 115 gr.!

Made of aluminium 2014 T6, the Modolo Kion stem with his lightweight match perfectly with high-end handlebars, either Road or Mtb.

Material: ALU 2014-T6 | **Size:** 90-100-110-120 mm | **Diameter:** 31,8mm
Color: anodized black | **Weight:** 115 gr.

MODOLO X-BOOST STEM

PERFORMANCE BIKE STEM

The Modolo X-Boost bike stem, made of quality aluminium 6061. Great weight and precise control of your track. Cold forged and CNC machined for a strong and light product.

Material: 6061 T6 CNC | **Size:** 90-100-110-120mm | **Diameter:** 31,8 mm
Angle: Reverse +/- 6° | **Finish:** Black | **Weight :** 125 gr. (100mm)

MODOLO DUMBO STEM

SHORT STEM FOR DUMBO HANDLEBAR

A solid stem to match with our Dumbo 3D handlebar, the short length match well with the already adjustable Dumbo 3D.

Material: 6061-T6 | **Size:** 75mm | **Diameter:** 25,4 mm
Angle: 5° | **Color:** Black anodized | **Weight :** 170gr.

MODOLO MORPHOS

COMPATIBLE INTEGRATED LEVER + SHIFTERS

Modolo Morphos integrated lever, one of the most versatile and compatible lever in the World ! Developed by Domenico Modolo the Morphos is compatible with most of the common gear such as Shimano 7,8,9,10 speed and Campagnolo 8,9,10 speed, support also 5/6 index as well. Modolo Morphos integrated lever, the future for your old bike.

With Modolo Morphos integrated lever you can brake while shifting. Made with high quality material of alluminium 7075 and thermo-plastic carbon fibre.

By simply working with a screwdriver from the front of the lever body, it is possible to change the speed system on the selector that runs straight through the lever. Both the brake and shift cables work in a straight line, reducing the risk of breakage due to repeated curving around a radius.

The Moprhos levers are a masterpiece of technology, completely designed in 3D CAD already in the late 1998.

With this lever you can take your old bike to future, keeping it very light. A pair of lever weights only 375 gr.

The shifting mechanism is protected from accidental falls. The brake lever is made of aluminum; the other parts are made of thermoplastic carbon fiber or CNC machined 7075-T6 light alloy.

Suitable for a amateurs who wants to increase the functionality of their bicycle without the need to replace the whole group, or to the Cyclo-cross riders, for the lightness and ergonomic shape.

Material : ALU 6081-7075- thermo-plastic carbon fiber
Compatibility : Shimano 7,8,9,10 / Campagnolo 8,9,10 V.
Color : Carbon look / Silver | **Weight :** 375 gr.

MODOLO DUMBO BIKE BAG

BIKE BAG FOR DUMBO HANDLEBAR

The all new Dumbo Bike Bag, born in collaboration with Italian brand Miss Grape, is studied to lock and match perfectly within the Modolo Dumbo 3D handlebar.

Made in Italy, this bag is water-resistant and has special shims to allow the easy passage of the cables. The rolling closures on both sides are equipped with a compression system that allows to minimize the outer dimensions of the bag.

Material: nylon 210 with PVC back, reinforcing fabric with nylon 420, polyester 300, with polyurethane resin | **Diameter:** 18 cm
Size: from 35 to 65 cm | **Volume:** 10 liters | **Weight:** 396 g

The new Dumbo Bike Bag is perfect for holidays and bike touring, match it with our Dumbo Handlebar for the best experience. Once fixed, you won't notice that a bag is hanging from your handlebar while riding!

MODOLO VINTAGE SADDLE BAG

ECO-LEATHER VINTAGE STYLE BAG

Modolo vintage saddle bag is a sweet eco-leather bag, perfect for your vintage bike. Early Modolo Logo embossed, fits on saddle or handlebar. Optimal for tools, sunglasses & little object.

Material: Eco-Leather | **Color:** Brown or black | **Weight:** 300 gr.

MODOLO VINTAGE FRAME BAG

ECO-LEATHER VINTAGE STYLE BAG

A simple but elegant accessories for your vintage road bike. Made in eco-leather with old Modolo logo embossed, suitable for containing tools, keys and similar object.

Material: Eco-Leather | **Color:** Brown or black | **Weight:** 230 gr.

A stylized, handwritten signature in black ink. The signature is composed of several overlapping, fluid strokes. It begins with a large, sweeping loop on the left side, followed by a series of sharp, intersecting lines that form a complex, abstract shape. The overall impression is that of a personal, cursive signature.
